

Talk Read Sing Play

Your Child is Learning

Make the moments count

In an everyday moment, you can be your child's first and best teacher just by talking — it's how your child learns and builds their brain power.

These learning moments help prepare them for kindergarten — it's never too early to start!

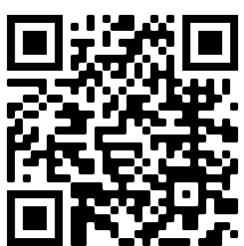

While you're waiting at the laundromat, use these fun ideas to help your child learn:

Ask your child to retell their favorite story or a TV show they watch. Retelling a story helps kids focus on the beginning, middle and end.

Play the game, "I Spy." Have them pick an item that they can see and have you guess what it is.

Count and match socks as you're doing laundry.

90%
of all brain development happens in the **FIRST FIVE** years of life.
